

# Purina Pro Plan Sport 30/20

## Health Guarantee

Our puppies are on a routine de-worming program and are given their first vaccinations. Validation of this guarantee requires the examination of your puppy by the vet of your choice and at the purchaser's expense within 48 hours of the pick-up date. This veterinary examination is mandatory to confirm that your puppy is not sick or injured in order for the guarantee to be complete. The guarantee against transmissible diseases such as Parvo-virus for example, is valid for a period of 7 days starting on the day of pick up, since normal incubation period for transmissible diseases is 5 to 7 days. For example: if the first signs of Parvo-virus were to show on a puppy 12-15 days from pick-up, the puppy could not have carried that disease from the breeder's premises and incubated it for that long before showing signs of the disease. The breeder guarantees the puppy until 1 year of age against life-threatening congenital and hereditary defect. It will be replaced with the first available puppy of the same value from the breeder's stock as soon as possible. The original puppy must be returned (at the owner's expense) before a new puppy can be replaced. In the event of death, an autopsy must be performed (at the owner's expense), by a licensed veterinarian to determine the exact cause of death. This information will then be sent to the breeder's veterinarian for review. The breeder is not responsible for hypoglycemia. The breeder is not responsible for any vet bills the buyer may incur. Only replacements will be made, no monetary refunds. The guarantee does not cover Hypoglycemia, coccidiosis, giardia, or hernias. If puppy dies, registration papers must be returned to the breeder for identification before replacement with another puppy.

By purchasing your puppy, you, the buyer, agree that you have read, understood and accept the terms of this contract. We have this guarantee to stress the importance of the health and well-being of your new puppy. Proper care is vital for the first few weeks of transition of your puppy.
